

## Exciting new physics in <sup>A</sup>Z \*

A. Author<sup>1,†</sup>, B. Bard<sup>1,‡</sup>, C. Coauthor<sup>1,2</sup>, and D. Delegate<sup>3</sup>

<sup>1</sup>*Université de Shelbyville, Shelbyville, France*

<sup>2</sup>*Capitol City National Laboratory, Capitol City, NB, USA and*

<sup>3</sup>*Springfield A&M University, Springfield, NO, Canada*

The conference will consist of invited talks, talks selected from contributed abstracts, and posters. Those wishing to contribute oral presentations or posters are invited to submit abstracts.

Abstracts are to be no more than one page in length, with all text and any figures fitting within a portrait-oriented rectangle 4.25" wide and 7.25" high (108 mm wide, 184 mm high). Use Times Roman font, 10pt or larger, for the body text. This example satisfies these requirements. If you include references, please use square brackets [1] and enter the references below [2]. For the output PDF filename, please use the contributing authors' e-mail address, replacing each punctuation character (@ signs, periods, etc.) with a single hyphen, and add a hyphen and number starting from 1 to identify multiple abstracts from the same corresponding author. Keep the .pdf extension. If this was Professor Bard's second abstract, the filename bbard-unishelby-fr-2.pdf would be appropriate.

Please e-mail the printer-ready US letter-size PDF to ns2014proc@conferences.triumf.ca on or before **April 1, 2014**. They will be distributed as submitted, at full size and resolution, to the international advisory committee for consideration. Authors will be notified about the selection for oral presentation on or before May 2, 2014.
